Calendar Week 38: Here is test result summary for Linaro ubuntu platform on following boards:

- 1) ARM Versatile Express A9;
- 2) Samsung Origen;

Device tree blob files have disappeared for 6 weeks, and 480p video playback doesn't work for 2 months. Application debug in DS5 suite works well now, by pre-install "arm-ds5-target" package on target. YouTube totally doesn't work, only preview picture shows.

2. Origen + ubuntu (Column V):

Dead lock error exists for 9 weeks, Unity 3D is unavailable from the beginning, Mini HDMI output never works either. WiFi is unavailable for 4 weeks and Bluetooth is even broken for a longer time. 480p video playback doesn't work for 2 months, however, DS5 works well on all features with "arm-ds5-target" package pre-installed.

<https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AroPySpr4FnEdEwwZkhrZ1VYUEg2LTIQZzR0RlhzM3c#gid=0>

YouTube HTML5 video playback failed again, it will hang the system. 480p video playback is unavailable for 2 months. Bluetooth headset works, but can't be powered off in paired condition, otherwise, it will hang the board. DS5 works.

<https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AroPySpr4FnEdEwwZkhrZ1VYUEg2LTIQZzR0RlhzM3c#gid=1>

YouTube HTML5 video playback works well. However, 480p video playback from SD card is still unavailable for 9 weeks. Bluetooth works except file transfer failed, and a paired device can be shut down without any side effect. DS5 works.
