Calendar Week 42: Here is test result summary for Linaro ubuntu image on following boards:

- 1) ARM Versatile Express A9;
- 2) Samsung Origen;
- 3) TI Panda Board 4430;
- 4) TI Panda Board 4460.

Synopsis: No change on feature status for vexpress A9, Samsung Origen and TI Panda 4460 boards. For Samsung Origen board, several important features are missing for a long time, such like WiFi, Bluetooth, Device Tree and HDMI display. Hopefully someone will investigate it in future. For TI Panda 4430, Bluetooth headset works.

1. vexpress A9 + ubuntu (Column AE):

Features' status is exactly same as previous week. Video playback and Device Tree are missing for a long time, others are OK. Since this is a low performance board, some functions work not that smoothly.

2. Origen + ubuntu (Column Z):

<https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AroPySpr4FnEdEowNWhZRi1zbDNNVUw1amhXTUdPcVE#gid=0>

Features' status is exactly same as previous week. Unity 3D, WiFi, Bluetooth, HDMI Display and Video playback are still unavailable. Power Management test would hang the system.

3. Panda 4430 + ubuntu (Column AB):

<https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AroPySpr4FnEdEwwZkhrZ1VYUEg2LTIQZzR0RlhzM3c#gid=0>

Bluetooth headset starts to work, however, Bluetooth still let system crashes during the pairing process with a laptop computer, and the file transfer is unavailable either. Power Management now works well, all tests passed.

4. Panda 4460 + ubuntu (Column AA):

<https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AroPySpr4FnEdEwwZkhrZ1VYUEg2LTIQZzR0RlhzM3c#gid=1>

Features' status is exactly same as previous week. The dead lock error still exists in the boot serial log although it currently doesn't affect the system running. File transfer over Bluetooth is unavailable, but the pairing process can be done successfully and Bluetooth headset works well too.

For the previous week (Calendar week 41) summary, please refer to attachment.

Thank you.
